Welcome to Signal and Image Processing! (DT081A)

Here on the start page you'll find everything you need to get started and find your way around the course.

Start with the Syllabus / Course overview: A good first step is to click on Syllabus. There you'll get an overview of the course's structure and setup. You'll also find central course documents, a presentation of the teachers, and information on how we will work together during the course.

Questions and communication: If you have questions, or want to discuss something with us teachers or with your fellow students, click on the Ask the Teachers icon. For personal messages to us, use the Inbox (see the Canvas menu).

Course content and assignments: You can access the course content through the icons further down on the start page, under the heading Parts of the Course. Here you'll find the content gathered in one place, and you can also choose to go via Modules in the course menu on the left. There you'll also find links to Assignments and Grades.

Once again, a warm welcome!

Prof. Mårten Sjöström & Mr. Mohammadreza Shamshirgarha
